

IDAN GIBLY

[Senior Fullstack Developer](#) | Ramat Gan, Israel | Hebrew (native), English (excellent)

Fullstack developer with 10+ years of experience building web applications across e-commerce, observability, HR-tech, medical, and ed-tech domains. Proficient in React, Angular, Node.js, and cloud infrastructure. Currently leading frontend development for a Shopify Hydrogen e-commerce platform. Passionate about clean architecture, developer experience, and delivering high-quality user-facing products end to end.

EXPERIENCE

Web Developer / Team Lead — [Keyzar Jewelry](#) (E-commerce) *Dec 2024 – Present*

- Leading front-end development of a custom Shopify Hydrogen storefront built with React, TypeScript, GraphQL, and Tailwind CSS.
- Architecting a reusable component library and establishing coding standards for a growing development team.
- Collaborating with design and marketing to optimize conversion funnels and site performance across desktop and mobile.

Senior Fullstack Web Developer — [Coralogix](#) (Observability) *Jan 2023 – Nov 2024*

- Developed features and microservices in a big-data environment using Angular, TypeScript, Node.js, MySQL, Docker, and Kubernetes.
- Contributed to scalable observability tooling serving enterprise customers with high-throughput data pipelines.
- Participated in architecture discussions and code reviews, helping maintain quality across a fast-moving engineering team.

Fullstack Web Developer — [Unboxable](#) (HR-tech) *Jul 2021 – Dec 2022*

- Built web servers and client applications supporting core product workflows for HR analytics and talent management.
- Partnered closely with product, design, and analytics stakeholders to deliver features iteratively.
- Implemented RESTful APIs and integrated third-party services to expand platform capabilities.

Frontend Web Developer — [Brainlab](#) (Medical) *Oct 2020 – Jul 2021*

- Developed features in a clinical web application for managing and visualizing patient medical data.
- Worked within strict regulatory and data-privacy requirements typical of the medical software domain.

Fullstack Web Developer — [Firearc](#) (Ed-tech / Advertising) *Jan 2018 – Sep 2020*

- Built the core web application that auto-generated educational courses by scraping and structuring Wikipedia content.
- Owned both frontend UI development and backend data-processing pipelines from design through deployment.

TECHNICAL SKILLS

Frontend: React, Angular, HTML, CSS, JavaScript, TypeScript, Tailwind CSS, Shopify Hydrogen

Backend: Node.js, NestJS, Express, GraphQL, REST APIs

Databases & Cloud: PostgreSQL, MySQL, MongoDB, Docker, Kubernetes, AWS, Google Cloud, Git

Other: Java (Android), C#, .NET

EDUCATION

B.Sc. in Mathematics & Computer Science — The Hebrew University of Jerusalem

ADDITIONAL COMPETENCIES

Full Stack Development · Frontend Development · Backend Development · Team Leadership · Microservices · API Design · API Integration · E-commerce · SaaS · Big Data · Data Pipelines · Scalability · High Availability · Architecture Design · Code Review · Component Library · Design Systems · Conversion Optimization · Cloud Infrastructure · Containerization
